How often have you heard “we don’t like the T-slots showing.”, “the open slots look unfinished.” or something similar? mk Automation, Inc. is pleased to offer a new line of extrusions designed with those issues in mind.

mk is now offering of closed slot extrusions for our Profile Series 40 that will give you a clean smooth finish on the exterior of the machine, enclosure or guard you are designing. Once assembled, the product features a smooth exterior, free of slots; and is therefore ideal for any application requiring high aesthetics. Furthermore closed slots eliminate areas for contamination to accumulate.

For ordering information, pricing and application examples please download our brochure.
